

Mohammad Sabbir Musfique

Software Engineer, AI/ML Enthusiast

Bachelor of Science (Bsc)

Department of Computer Science and Engineering (CSE)

Military Institute of Science and Technology (MIST)

Email: sabbir.musfique01@gmail.com

Github: [sabbir-063](https://github.com/sabbir-063)

LinkedIn: [msmusfique063](https://www.linkedin.com/in/msmusfique063)

Contact Number: +8801884952804

Address: Mirpur, Dhaka-1216

EXPERIENCE

Junior Software & Data Engineer | *Be Data Solutions*

Sept 2025 – Present

Tucki – AI-based Family Nutrition App (Backend)

Node.js, TypeScript, PostgreSQL, Prisma, pgvector

- Built backend services for meal logging, weekly meal plan generation, and nutrition score computation.
- Developed APIs to support RAG-based nutrition Q&A and personalized food recommendations.

Leasedrop – Lease extraction Software (Backend)

Java, Spring Boot, PostgreSQL, Redis, SSE

- Developed Organization and Workspace APIs enabling organizations to create accounts, manage workspaces, and invite users with structured access control.
- Implemented lease document chat functionality using Server-Sent Events (SSE) to stream Gemini API responses chunk by chunk for real-time lease Q&A and comparison.

Audience Intelligence – User Segmentation Platform (Backend)

Java, Spring Boot, Microservices

- Integrated Azure Blob Storage using SAS URLs to enable cloud-based data analysis.
- Fixed and stabilized existing SFTP server, Big query integrations for secure data ingestion.
- Prepared datasets for ML microservices performing K-Means clustering for user segmentation.

IntelliSearch – CI/CD Automation

Jenkins, GitLab CI, React, Node.js

- Designed and maintained CI/CD pipelines for frontend (React + TypeScript) and backend (Node.js).
- Automated build and deployment workflows, improving deployment reliability using Jenkins.

CRM System (NPS Module) – Frontend Contributions

React, TypeScript

- Improved lead collection workflows and dropdown management features.
- Improved UI consistency and collaborated with backend teams for API integration.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, Dart, C, C++

Development Stack: MERN, Flutter, Spring Boot

Databases: PostgreSQL, Prisma, MongoDB, Firebase, MySQL, Faiss

Machine Learning: Model Development, Sk-learn, Tensorflow, Keras, NLP, OpenCV, Langchain

Relevant Coursework: DSA, OOP, DBMS, OS, Software Engineering

Spoken Languages: Bangla (Native), English (Professional)

PROJECTS

NextBlog - A Blogging Website

[Live Link](#) | [Client Code](#) | [Server Code](#)

React, Node, Express, MongoDB, Tailwind, Vercel, Render

- Built a blogging platform enabling users to register, create and manage posts, and maintain profiles.
- Integrated secure authentication, protected routes, rich-text editing, image uploads, and error handling.

Bikreta - A Friend of Growth

[Live Link](#) | [Client Code](#) | [Server Code](#)

React, Node, Express, MongoDB, Cloudinary, Netlify, Render

- Built a e-commerce platform that empowers small business owners to purchase products in bulk.
- Included admin dashboards to analyze sales trends using basic data visualizations.

OneConnect App - Android-based Donation Platform

[Demo Video](#) | [Full Code](#)

Flutter, Firebase, Firestore, Getx

- Developed a donation app enabling users to contribute to verified individual posts, a central fund.
- Implemented role-based access control for admins to manage users and see donation data through graphs.

Multilingual-RAG-Pipeline

FastAPI, Faiss, Gemini AI, Sentence Transformers

Full Code

- Developed a multilingual RAG system using FastAPI, Faiss, and Google Gemini AI, enabling semantic search and question answering in both English and Bangla with content safety guardrails.

Bangla Sign Recognition using Hand Gestures

Tensorflow, Keras, GridSearchCV, Sk-learn, OpenCV

Full Code

- Trained and optimized multiple ML and DL models on augmented BdSL datasets using GridSearchCV, and integrated the best model into a real-time sign detection system with OpenCV and MediaPipe.

Cold Email Generator

Streamlit, LangChain, Gemini AI, Faiss

Live Link | Full Code

- Developed a Cold Email Generator app that scrapes job postings, matches requirements with portfolio items using Faiss and Sentence Transformers, and generates emails with Gemini AI and LangChain.

ACHIEVEMENTS

Finalist in SRBD Code Contest 2025	Oct 2025
Solved 600+ Problems in Leetcode (Max Rating : 1496, Username: sabbir_063)	May 2025
Pupil in Codeforces (Max Rating : 1388, Username: sabbir_063)	July 2024
2 star in CodeChef (Max Rating : 1573, Username: sabbirmusfique)	May 2024
7 th place in Independent Day Programming Contest 2023	Apr 2023

PROGRAMMING CONTESTS

UU Inter University Programming Contest 2025	Jun 2025
Team: MIST_hotasha	Position: 72th
DUET Inter University Programming Contest 2025	May 2025
Team: MIST_EaglesEye	Position: 65th
Independent Day Programming Contest 2023	Apr 2023
Team: MIST_Troubleshooters	Position: 7th
SEC Inter University Junior Programming Contest 2022	Aug 2022
Team: MIST_UpsideDown	Position: 51th

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - Oracle Cloud Certificate	Aug 2025
Problem Solving (Intermediate) Certificate - HackerRank Certificate	Jan 2025
Intermediate Git Certificate - Datacamp Certificate	May 2025
SQL (Intermediate) Certificate - HackerRank Certificate	Apr 2025
Supervised Learning with scikit-learn - Datacamp Certificate	Dec 2024
Introduction to Natural Language Processing in Python - Datacamp Certificate	Dec 2024
Full Stack Development with MERN - Grameenphone Academy Certificate	July 2025

EDUCATION

Military Institute of Science and Technology	Apr 2021 – July 2025
Bachelor of Science in Computer Science and Engineering.	Mirpur, Dhaka
